Tokyo, Japan and Copenhagen, Denmark –July 14, 2014 – Otsuka Pharmaceutical Co., Ltd. and H. Lundbeck A/S, today announced the submission of a New Drug Application (NDA) to the United States Food and Drug Administration (FDA) for brexpiprazole for the treatment of schizophrenia and as adjunctive treatment of major depressive disorder (MDD).

The clinical development program for brexpiprazole included more than 6,500 participants of whom more than 5,300 received brexpiprazole. The NDA is supported by seven completed Phase 2 or 3 clinical studies in the proposed indications. Following the submission the U.S. Food & Drug Administration (FDA) will determine if the NDA is sufficiently complete to allow for a substantive review of the data; a decision from the FDA on initiation of the substantive review is expected in September 2014.

Brexpiprazole is a novel investigational compound discovered by Otsuka and under co-development with Lundbeck. Brexpiprazole is a serotonin-dopamine activity modulator (SDAM) that acts as a partial agonist at 5-HT_{1A} and dopamine D₂ receptors at similar potency, and an antagonist at 5-HT_{2A} and noradrenaline alpha_{1B/2C} receptors.
